

Secure Milk Supply Plan

In the Event of a Foot and Mouth Disease Outbreak

What is the Secure Milk Supply (SMS) Plan?

- Provides a workable business continuity plan for dairies that are under movement restrictions but *not infected* with foot and mouth disease (FMD)
- Offers movement guidance for producers, haulers, processing plants, and officials managing the outbreak
- Provides biosecurity and surveillance tools for producers

Business Continuity

Biosecurity

How will the U.S. respond to a Foot and Mouth Disease (FMD) outbreak?

- Response will focus on stopping the spread of this animal disease
- Control Areas will be set up around FMD infected and surrounding farms
- Movement restrictions will be put in place for animals and animal products (*milk!*) in Control Areas

Movement Guidance

Surveillance

Why is the Secure Milk Supply Plan needed?

- Help dairies in Control Areas whose cattle have no signs of FMD continue to move milk
- Limit milk disposal problems and lost income for dairies, haulers, processors, and grocers
- Maintain the supply of milk and milk products to consumers because FMD is not a public health or food safety concern

How can you voluntarily participate in the Secure Milk Supply Plan?

- Contact your State Animal Health Official to request a Premises Identification Number (PIN)
- Visit the Secure Milk Supply website securemilksupply.org
- Develop your dairy's SMS Plan using the materials available in English and Spanish
