Secure Milk Supply Plan
In the Event of a Foot and Mouth Disease Outbreak

What is the Secure Milk Supply (SMS) Plan?
• Provides a workable business continuity plan for dairies that are under movement restrictions but not infected with foot and mouth disease (FMD)
• Offers movement guidance for producers, haulers, processing plants, and officials managing the outbreak
• Provides biosecurity and surveillance tools for producers

How will the U.S. respond to a Foot and Mouth Disease (FMD) outbreak?
• Response will focus on stopping the spread of this animal disease
• Control Areas will be set up around FMD infected and surrounding farms
• Movement restrictions will be put in place for animals and animal products (milk!) in Control Areas

Business Continuity

Movement Guidance

Biosecurity

Surveillance

Why is the Secure Milk Supply Plan needed?
• Help dairies in Control Areas whose cattle have no signs of FMD continue to move milk
• Limit milk disposal problems and lost income for dairies, haulers, processors, and grocers
• Maintain the supply of milk and milk products to consumers because FMD is not a public health or food safety concern

How can you voluntarily participate in the Secure Milk Supply Plan?
• Contact your State Animal Health Official to request a Premises Identification Number (PIN)
• Visit the Secure Milk Supply website securemilksupply.org
• Develop your dairy's SMS Plan using the materials available in English and Spanish

The Secure Milk Supply Plan is funded by USDA.
